FINAL YEAR PROJECT

Configuration Control Dashboard

for any configurable product

Project Goals

- Track every item
- Control every change
- Auto-detect drift
- Audit in seconds

WORKFLOW

How It Works

1 Collect — Sync every source

Code · Changes · Hardware · Releases → One database

2 Compare — Three-way check

Approved baseline + Actual deployed + Authorized change requests

3 Alert — Flag drift instantly

Match — Compliant

Unapproved change — Alarm raised

4 Control — Change by approval

Request → Review → Approve → New baseline

5 Report — Audit-ready anytime

Live dashboard — 7 pages

Audit report — PDF in one click

Project Plan

Research · Data sync · Engine · Dashboard · Testing

Deliverables

- Dashboard
- Live sync
- Drift alerts
- Audit report
